

The Crisis of Europe: what solution?

From diversity to union

As a new-born baby, made of different sizes, colours and types of tree and part of a big forest, Europe has been facing numerous challenges, internal and external (economic crisis, demographics, migration/integration, health, war, conflict) and the recurrent question is the same one: where to go / how to solve this puzzle?

The solution is in Union (United in Diversity, and already breathing our own tree).
